Address: Hanoi, Vietnam

OBJECTIVE

I am a second-year Software Engineering student at FPT University with a full scholarship. Currently, I am focusing on becoming a Backend Developer Intern, with my main technologies being **Node.js, Express.js**, and database tools such as **SQL Server, MongoDB**. I am opened to become a Fullstack Developer by having some projects using React.js, Next.js, and Tailwind CSS

PROJECTS

Jan 2025 - Apr 2025

Soul Sync

Backend Developer, Team Leader - Team size: 5

Anonymous matchmaking web app based on zodiac signs, numerology, location, and interests, with real-time chat integration.

- Designed schemas and built the MongoDB database.
- Built CRUD methods, JWT authentication and matching algorithms for couples using Node.js, Express.js.
- Implemented real-time chat using Socket.IO
- Supported 50+ concurrent users with matching time less than 2 seconds
- Technologies: Node.js, Express.js, MongoDB, Socket.io
- Website: https://soulsync-fe.pages.dev
- Source: https://github.com/nobitandoraemon/SoulSync-be

May 2025 - July 2025

J-surviv Game SDK - CodeFest 2025

SDK Developer - Team size: 30

Developed a Java SDK (Software Development Kit) for players to control their bots in J-Surviv, a battleground game where players program their bots in Java. Worked in a cross-functional team of 30 developers (Game Client, Game Server, Player SDK)

- Maintained and refactored the codebase from CodeFest 2024, reducing duplicated logic by 35%.
- Designed and added 10+ new actions for bots, items, and gameplay parameters
- Used Java Socket.IO to receive, categorize and send data to the server
- Technologies: Game Client: Unity; Game Server: Node.js, SocketIO; Player SDK: Java
- Releases: https://github.com/fu-js/j-surviv-SDK/releases
- Source: https://github.com/fu-js/j-surviv-SDK

SKILLS

Backend	Node.js, Express.js, JWT, Restful APIs, Socket.io, Java
Databases	SQL Server, MongoDB
Frontend	React.js, Next.js, TailwindCSS, UI Library
Tools	Git, Github, Postman
Languages	English (B2), Vietnamese, Japanese (Elementary)

EDUCATION

Sep 2024 - Dec 2027

FPT University

Computer Software Engineering - Full scholarship

- Current GPA: 3.8/4

ACTIVITIES

Jan 2025 - Present

FPTU JS Club - Japanese Software Engineers

Member of Expertise Department, Developer

- The Japanese Software Engineers Club is a gathering place for those who are passionate about Japanese and programming at FPT University.
- Manage and motivate members, work as leader/member of the organization committee for various events, academic activities and projects of the club.
- Develop some software applications: Soul Sync web, J-surviv SDK.

May 2025 - July 2025

CodeFest 2025

Developer, IT support staff

- Organized CodeFest 2025, one of the most successful academic tech events at FPT University, attracting over 160 participants from many universities in Hanoi.
- Introduced and successfully launched J-surviv - a unique code-based Battle Royale competition.

HONORS & AWARDS

July 2024	The National Valedictorian of the A00 group in the 2024 National High School Graduation Exam
Feb 2025	Third Prize at Algorithm Arena 6.0: Enjourney (50+ participants)

CERTIFICATIONS

Jan 2026	Software Engineering Specialization
June 2025	Web Design for Everybody: Basics of Web Development & Coding Specialization
Mar 2025	Academic Skills for University Success Specialization
